## **Elements of Design**

The first and most basic element of design is that of the line. In drawing, a line is the stroke of the pen or pencil but in graphic design, it's any two connected points. Lines are useful for dividing space and drawing the eye to a specific location. For example, think about how a magazine uses lines to

Negative space has long been a staple of good design. Leaving white space around elements of a design is the first thing that usually comes to mind. But then there are designs that use that white space to infer an element that isn't actually there (the arrow hidden between the E and X in the FedEx logo)
